Summary

Using my experiences and acquired knowledge, my ambition is to continually grow and improve my skillsets to become a better developer.

Capabilities

Ruby, Ruby on Rails, HTML5, CSS3, SQL, JavaScript

Projects

Gibbit | www.gibbit.online | lewagon.com/demoday/58/gibbit

◆ Lead developer for an online service that helps foreigners living abroad

■ We created a two-sided service where users could sign-in and live chat with one of the admins for assistance. I was personally responsible with the design and functionality of the user and admin dashboards. I was also in charge of the UX and layout of the home page and chatroom, along with implementing Stripe to pay for service.

Studio Fifty-Find | studio-fifty-find.herokuapp.com

◆ Co-developer for a music studio booking service in Tokyo

■ This was a one week project sprint to create a market-place. I created the back-end CRUD methods to book studios and designed the studio booking pages. I also implemented the Google Maps Geocoding API along with mailer confirmations.

Mr. Cocktail | mr-cocktail-dmbf29.herokuapp.com

◆ Created a recipe book for cocktail mixing

■ I created this project to practice nested routes, photo uploading and adding customizable doses to each cocktail instance.

Skills

- Object-Oriented Programming
- Web Design
- Online Transactions
- UX & UI Design
- Cross-Browser Capability
- Hosting & Maintenance
- Site Troubleshooting
- Database Schema
- Mockup Building
- APIs and Scraping

English - Native

Korean - Business
